Art Unit: 1714

The request for reconsideration received January 8, 2004 has been made of record.

Claims 1-22 are pending.

Claims 1-8 and 20-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Ishikawa.

This rejection is maintained substantially as set forth in the previous office action. Applicant has argued that the articles of the reference are rigid rather than flexible and cites an example in the reference where polyurethane foam is used. Applicant has apparently overlooked the statement by the reference that "the flame retardant particles of the present invention can be applicable to any conventional thermoplastic or thermosetting resin..." at column 8, lines 15-17.
